DETAILED ACTION

1. The amendment filed 09-16-05 has been entered. Accordingly, claims 40, 47-51, and 53-57 remain pending. It is noted that in the Remarks, the Applicants have mistakenly included claim 46 in the pending claim.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 40, 47-51, and 53-57 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

There is no support in the specification for the claim limitations "wherein said buffer memory has a data storing capacity wherein said buffer memory has a data storing capacity enabling the transfer of a unit of data of a length equal to the data length of said data to be stored at one time of said program operation," (claim 40, lines 12-14 and claim 51, lines 13-15) in the application as filed. A shift register 337 in figure 6A of the instant application is a data shift register, which function is to shift data from its input to output. The shift register 337 does not have a data storing capacity enabling the receiving of a unit of a data length equal to the data length of the data to be stored at one time of the program operation as claimed in claims 40 and 51. Claims 47-50

and 53-57 are rejected because in their dependency they include the limitations of a base claims 40 and 51, respectively.

Interference

4. Claims 40, 47-51, and 53-57 of this application is asserted by applicant to correspond to claim(s) of U.S. Patent No. 6,538,926.

The examiner does not consider this claim to be directed to the same invention as that of U.S. Patent No. 6,538,926 because the independent claims 40 and 51 lack support for the claimed subject matter. Nowhere in the specification suggests a buffer memory capable of storing data in the buffer memory to ones of nonvolatile memory cells. Accordingly, interference cannot be initiated based upon this claim.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
